HI-ACCURACY DIGITAL CARBOY-SCALE™

FOR SMALL DRUMS AND CARBOYS

SAFELY MONITOR
CHEMICAL USAGE
AND LEVEL

**FOR FLUORIDE,
SODIUM HYPOCHLORITE
AND OTHER CHEMICALS**

HIGHLY ACCURATE
FOR VERY LOW FEED RATES

**WITH SOLO G2® OR
WIZARD 4000® INDICATORS**

The Hi-Accuracy Digital Carboy-Scale™ provides a simple and accurate way to monitor how much chemical is being fed and how much remains in small drums and carboys. This system is ideal for applications where feed rates are very low and accuracy is critical. The scale platform has a solid PVC upper deck with an epoxy powder

coated steel base to resist corrosion in harsh chemical environments. The single point load cell design keeps electronics to a minimum for increased reliability while still providing accuracies better than 1/10 of 1% full scale. Using a scale is the most accurate method available for monitoring chemical inventory.
